SLAVERY RECORD

For the Liberian.

INSTITUTES OF CRUELTY.

Already do the hearts of many of the cultivators of the soil feel for the New African, a regard that will not be extinguished by the enervating influence of slavery. And have we a sound feeling for this object? When the slave is the first of all men to show any sentiment in support of his kindred, he will then have found true friends, and his influence is certain to produce an effect.

There are some points which have been passed over, and which are important to the future of the African Republic. The first is the origin of its laws. The second is the condition of the Negro in the United States. The third is the progress of the African nation.

The reader will find a detailed account of these topics in the following pages.
