which the reviewer promises to dispose of the whole subject, and which, I will venture, will be fundamentally improved, is the American Temperance Society. They have a number of local branches, and it is to these that the reader must look for moral instruction, as well as ecclesiastical. In the list of localities given in the American Temperance Society, there is no mention of New York, which is one of the most interesting and important places in the United States. It is true that the American Temperance Society has branches in various parts of the country, but it is by no means certain that any one of them will be able to carry the work of the Society to the people of New York, unless they are well supplied with the necessary materials for the purpose. The Society has a large number of publications, and these publications should be distributed as widely as possible. It is also important that the Society should have a large number of subscribers, and this will be the case if the publications are distributed in the best possible way.

There is no reason why the American Temperance Society should not be able to carry the work of the Society to the people of New York, unless they are well supplied with the necessary materials for the purpose. The Society has a large number of publications, and these publications should be distributed as widely as possible. It is also important that the Society should have a large number of subscribers, and this will be the case if the publications are distributed in the best possible way.
