TWO SHAKES OF BLACK.

PRESTIGIOUS SHORT CATHEDRALS.

Says the New York Tribune—The grand Cenotaph in that city is the largest and most important monument of its kind in the world. It is the work of the late Mr. McBean, and is composed of four magnificent columns, each of which is about sixty feet high, and surmounted by a statue of the first President of the United States. The columns are supported by a series of magnificent arches, and the whole is adorned with a beautiful inscription, which reads, 'Here rests the body of a great man.' The monument is surrounded by a beautiful garden, and is visited by thousands of people every day. It is said to be the most popular monument in the city, and is regarded as a national monument.
