Refuge of Oppression.

The United States Constitution is a document of the United States of America, which superseded the Articles of Confederation and established the government of the United States. It consists of 7 articles and an amendment process that has resulted in the creation of 27 amendments to the original document. The Constitution is the supreme law of the land, and its authority is derived from the consent of the governed.

The Constitution was adopted on September 17, 1787, and was signed by 39 delegates who represented 12 of the 13 states. It went into effect on May 7, 1791, when Rhode Island ratified it. The Constitution was the result of a Constitutional Convention that was called in 1787 to address the weaknesses of the Articles of Confederation, which had been the governing document since 1781.

The Constitution is divided into seven articles, each addressing a different aspect of government. The first three articles establish the federal government, including the legislative, executive, and judicial branches. The fourth article establishes the rights and privileges of citizens, including the right to vote, the right to bear arms, and the right to a speedy trial.

The Constitution has been amended 27 times since 1789. The first ten amendments, known as the Bill of Rights, were adopted in 1791 and establish the fundamental rights and freedoms of United States citizens.

The Constitution is the foundation of the American legal and political system, and it has been the subject of debate and interpretation throughout American history.
THE LIBERATOR.

LETTER TO A FEMALE FRIEND.

The appearance of this letter is so similar to the previous one that it is difficult to distinguish between them. It seems to be a continuation of the same theme or conversation. The text is not legible due to the quality of the image.
