Refuge of Oppression.

The abolitionist traits of the Liberator.

The great spirit of David Walker in reply to Mr. Calhoun has been another masterly stroke in the battle for freedom which has been carried on in the ranks of the abolitionists, and has been a fitting sequel to the memorable essays of the former, which have been a source of comfort and encouragement to thousands of colored people in their darkest hours.

In the course of the present year, the most prominent of these essays has been Mr. M. W. Tyler's "Slaveholders' Almanac," which has been published in a large number of copies, and which has been distributed among the colored people in New York, Boston, Philadelphia, and other places. The work has been well received, and has been a source of great pleasure and comfort to the colored people, and has been a source of great encouragement to the friends of freedom.

The essays of Mr. M. W. Tyler have been well received, and have been a source of great comfort and encouragement to the colored people, and have been a source of great encouragement to the friends of freedom.

THE LIBERATOR

IN MEMORIAM.

I know I find the heart of my love in thee.

—Shakespeare.

If 214 years ago, on the 9th of December, Mr. Gridley Brooks moved the passage of a resolution in the Massachusetts General Court, embracing the abolition of slavery, the effect of his voice was slight.

Thirty years ago, I realized that I had to try to do something toward the speedy abolition of slavery, and looking toward the day of my trial, I knew that I must do it in the presence of the world and not in the presence of the court. I have found that the world is more interested in the facts of our national history than in the facts of our domestic history. I have found that the world is more interested in the facts of our political history than in the facts of our social history. I have found that the world is more interested in the facts of our religious history than in the facts of our economic history. I have found that the world is more interested in the facts of our industrial history than in the facts of our intellectual history. I have found that the world is more interested in the facts of our military history than in the facts of our philosophical history. I have found that the world is more interested in the facts of our biological history than in the facts of our aesthetic history. I have found that the world is more interested in the facts of our geophysical history than in the facts of our anthropological history. I have found that the world is more interested in the facts of our chemical history than in the facts of our botanical history. I have found that the world is more interested in the facts of our geological history than in the facts of our astronomical history. I have found that the world is more interested in the facts of our meteorological history than in the facts of our climatological history. I have found that the world is more interested in the facts of our zoological history than in the facts of our botanical history. I have found that the world is more interested in the facts of our geological history than in the facts of our physical history. I have found that the world is more interested in the facts of our economic history than in the facts of our social history. I have found that the world is more interested in the facts of our industrial history than in the facts of our political history. I have found that the world is more interested in the facts of our military history than in the facts of our religious history. I have found that the world is more interested in the facts of our philosophical history than in the facts of our scientific history. I have found that the world is more interested in the facts of our aesthetic history than in the facts of our economic history. I have found that the world is more interested in the facts of our biological history than in the facts of our cultural history. I have found that the world is more interested in the facts of our chemical history than in the facts of our historical history. I have found that the world is more interested in the facts of our botanical history than in the facts of our biological history. I have found that the world is more interested in the facts of our zoological history than in the facts of our chemical history. I have found that the world is more interested in the facts of our geological history than in the facts of our biological history. I have found that the world is more interested in the facts of our meteorological history than in the facts of our astronomical history. I have found that the world is more interested in the facts of our climatological history than in the facts of our physical history. I have found that the world is more interested in the facts of our anthropological history than in the facts of our cultural history. I have found that the world is more interested in the facts of our philosophical history than in the facts of our chemical history. I have found that the world is more interested in the facts of our aesthetic history than in the facts of our biological history. I have found that the world is more interested in the facts of our economic history than in the facts of our geological history. I have found that the world is more interested in the facts of our political history than in the facts of our biological history. I have found that the world is more interested in the facts of our religious history than in the facts of our chemical history. I have found that the world is more interested in the facts of our scientific history than in the facts of our aesthetic history. I have found that the world is more interested in the facts of our cultural history than in the facts of our biological history. I have found that the world is more interested in the facts of our educational history than in the facts of our chemical history. I have found that the world is more interested in the facts of our economic history than in the facts of our physical history. I have found that the world is more interested in the facts of our industrial history than in the facts of our biological history. I have found that the world is more interested in the facts of our military history than in the facts of our cultural history. I have found that the world is more interested in the facts of our religious history than in the facts of our aesthetic history. I have found that the world is more interested in the facts of our scientific history than in the facts of our economic history. I have found that the world is more interested in the facts of our educational history than in the facts of our chemical history. I have found that the world is more interested in the facts of our biological history than in the facts of our cultural history. I have found that the world is more interested in the facts of our meteorological history than in the facts of our educational history. I have found that the world is more interested in the facts of our climatological history than in the facts of our economic history. I have found that the world is more interested in the facts of our anthropological history than in the facts of our educational history. I have found that the world is more interested in the facts of our geophysical history than in the facts of our biological history. I have found that the world is more interested in the facts of our philosophical history than in the facts of our educational history. I have found that the world is more interested in the facts of our aesthetic history than in the facts of our biological history. I have found that the world is more interested in the facts of our economic history than in the facts of our geophysical history. I have found that the world is more interested in the facts of our political history than in the facts of our educational history. I have found that the world is more interested in the facts of our religious history than in the facts of our educational history. I have found that the world is more interested in the facts of our scientific history than in the facts of our educational history. I have found that the world is more interested in the facts of our cultural history than in the facts of our educational history. I have found that the world is more interested in the facts of our geographical history than in the facts of our educational history.

The world knows nothing of this day.

It was apparently known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this day.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.

It was known to some.

But the world knows nothing of this.
