THE LIBERATOR

OUR COUNTRY TO THE WORLD, OUR COUNTRYMEN ARE ALL MANKIND.

J. B. TERRIER & Co., PRISONS.

VOL. XXXV. NO. 45.
BOSTON, FRIDAY, NOVEMBER 10, 1865.
WHOLE NO. 1814.

Selections.

GEORGE WASHINGTON'S TREATY.

We know nothing better than what our ancestors taught us.

A LETTER FROM MRS. L. MARIA CHILD.

A. Letter from Mrs. L. Maria Child.

HENRY WARD BEECHER.

Have you heard? among the men and women! He's a bright star in the skies above, a shining light in the darkness of the night, a guiding beacon on the sea. His words are music to our ears, and his spirit is a breath of life to our souls. He is always ready to lend a helping hand to those in need, and his kind and charitable nature is a source of comfort to all who know him.

Mr. Beecher was a man of great wisdom and foresight. He was always willing to take a stand for what he believed in, and he never shied away from the challenges that life threw his way. He was a true American, and his legacy will live on for generations to come.

The School for Freedmen.

The School for Freedmen, located in New York City, was founded in 1865 to educate former slaves and prepare them for life in freedom. The school was established with the help of Northern philanthropists and abolitionists, who recognized the importance of educating former slaves to help them build better lives for themselves and their families.

The school offered a variety of subjects, including reading, writing, arithmetic, history, and geography. It also provided vocational training in carpentry, blacksmithing, and other trades to help former slaves find employment.

The school was open to all races and both sexes, and it was designed to be an equal opportunity institution. However, the school faced many challenges, including a lack of funding and a shortage of qualified teachers.

In 1867, the school was renamed the Freedmen's Industrial School, and it continued to operate until 1902. During its existence, the school provided education and training to thousands of former slaves and played an important role in the nation's effort to help former slaves build better lives for themselves and their families.

To many Republicans.

The Republicans are the party of the people, the party of liberty and equality. They stand for the freedom of the press and the right to speak our minds. They believe in the power of the people and the rule of law. They are the party of the American dream, and they believe in making America great again.

The Republicans are the party of progress and innovation. They believe in science and technology, and they are committed to building a better future for our children and grandchildren. They believe in investing in education and infrastructure, and they are committed to making our country a better place to live.

The Republicans are the party of the middle class. They believe in fairness and justice, and they are committed to making sure that everyone has a fair shot at success. They believe in tax reform and economic growth, and they are committed to creating jobs and opportunity for all Americans.

The Republicans are the party of the future. They believe in the power of freedom and the promise of a brighter tomorrow. They are dedicated to building a better country for all Americans, and they are committed to serving as a beacon of hope and progress in the world.
THE LIBERATOR.

MARCHER PROTESTANT LIBRARIAN.

THE LIBERATOR.

BOSTON, SATURDAY, NOVEMBER 12, 1859.

The English literature is copyrighted and all attempts to reproduce it without permission are illegal. It is not to be distinguished from the Federalist, which was also a copyrighted work and all attempts to reproduce it without permission were illegal.
The Liberator

November 10

The most wonderful victories of the
army's history have been
achieved in Ireland.

RIPON PETROLEUM STOVE.
One of the most brilliant successes
of the year.

The story of the Ripon Petrol-
Stove is a remarkable one. It
was invented by Mr. Ripon,
who has been experimenting
with oil stoves for many years.

The invention is based on the
principle of the gas stove, but
uses oil instead of gas.

The stove is simple in construc-
tion and very efficient. It con-
sists of a metal casing with a
flue running through it, and a
burner at the bottom. The
burner is supplied with oil by a
pump, which is operated by
hand.

The oil is heated in a separate
chamber, and then forced into
the burner, where it is ignited.

The heat produced is directed
through the flue into the room.

The stove is designed for use
in the home, and is particularly
suited for winter months. It is
easy to operate, and can be
adapted to any size of room.

The Ripon Petrol Stove has
already received much praise
from users, and is expected to
be a great success in the com-
merce of the country.

The Ripon Petrol Stove is
distributed through a network
of dealers throughout the
United States.

The inventor, Mr. Ripon, is
expected to attend the national
exhibition in the coming month,
during which time the stove will
be on display.

The story of the Ripon Petrol
Stove is a tale of ingenuity and
entrepreneurial spirit, and it
stands as a testament to the
potential of new technologies to
improve the lives of ordinary
people.

And so, as the winter season
settles in, we can look forward
to a new era of comfort and
warmth, thanks to the Ripon
Petrol Stove.
